Understanding (Q21)	51
Medicine Purpose (Q22)	58

The HCAHPS Survey Individual Question Top-Box Scores Table contains the national average “top-box” score for each of the 15 individual survey questions that are used to form the six HCAHPS composite measures.

Please note: Individual question scores are presented for informational purposes only; they are not official HCAHPS measures. The simple average of the individual questions that comprise a composite measure may not always match the published national average for that composite.

These results encompass all hospitals that participated in the HCAHPS October_2023 Public Report.
