*Patient-level Pearson correlations of rescaled linear means of HCAHPS measures, for patients discharged between January 2025 and December 2025 (2.5 million completed surveys).
Note: All correlations are significant at $p<0.001$.

*These results encompass all hospitals that received HCAHPS scores. Because not all hospitals report their results on Care Compare, the values on that Web site may differ from those shown here.
Hospitals must have a minimum of 25 completed surveys in a four-quarter period for their HCAHPS results to be publicly reported.

Note: *Restfulness of Hospital Environment, Care Coordination* , and *Information About Symptoms* are new HCAHPS measures, and *Responsiveness of Hospital Staff* is a newly revised HCAHPS measure beginning with October 2026 public reporting (January 2025 through December 2025 discharges).
