* Percentiles for HCAHPS "Top-box" and "Bottom-box" scores include 4,443 hospitals that received HCAHPS scores in April 2023. Because not all hospitals report their results on Care Compare, the number of hospitals may differ from those shown here. Surveys are from patients discharged between July 2021 and June 2022. Scores have been adjusted for survey mode and patient-mix.

¹ The "**Top-box**" is the most positive response to HCAHPS survey items. Percentiles indicate how often patients gave positive assessments of their hospital experience. With "Top-box" scores, the higher, the better. For example, on "Communication with Nurses," 5% of hospitals scored 91 or higher (95th percentile) in the "Top-box," while 5% scored 69 or lower (5th percentile). The *median (50th percentile) score on this measure was 79.*

² The "**Bottom-box**" summarizes the least positive responses to HCAHPS survey items. Percentiles indicate how often patients gave negative assessments of their hospital experience. With "Bottom-box" scores, the lower, the better. For example, on "Communication with Nurses," 5% of hospitals scored 0 or lower (5th percentile) in the "Bottom-box," while 5% scored 10 or higher (95th percentile). The *median (50th percentile) score on this measure was 5.*
